

MTEP 2009 & JCSP 2008 Generator Siting Workshop Additional Slides

Midwest ISO
St. Paul, Minnesota
February 5, 2008

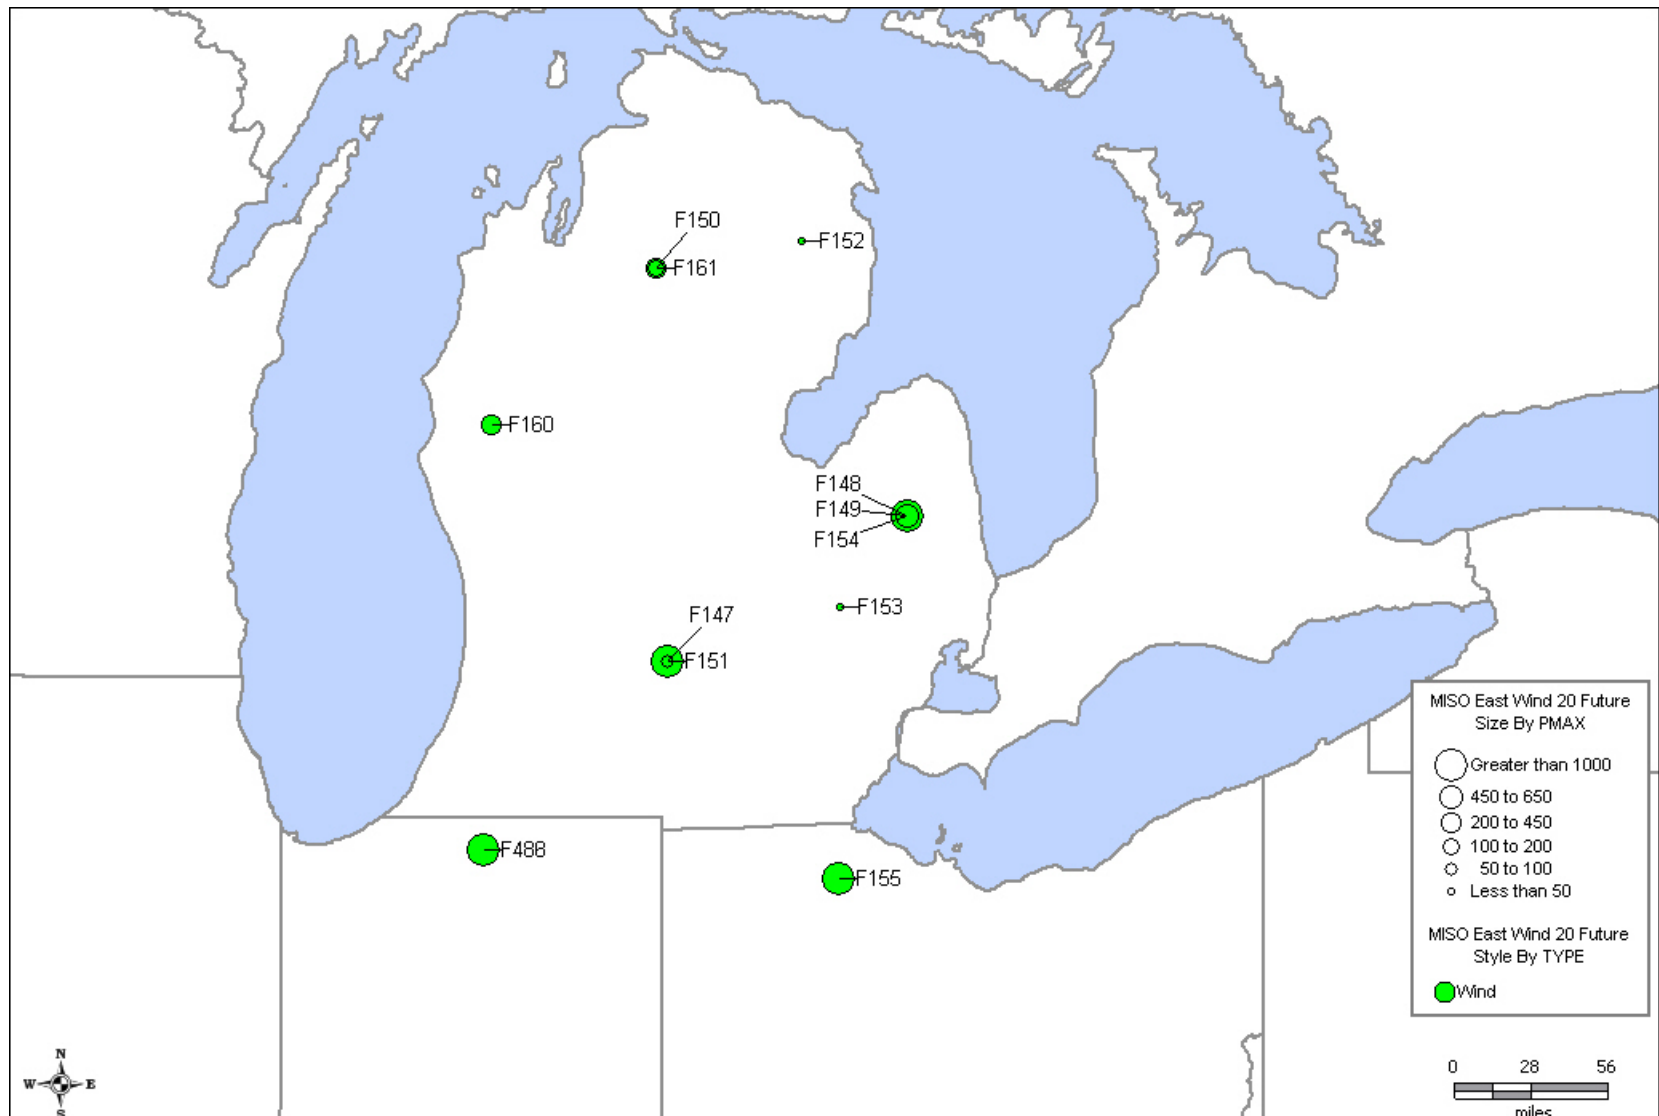

Overview

- The wind siting was done with the assistance of the Department of Energy based on study work previously performed but unpublished at this time
- Slides show the “general” area of wind sited within a region, for serving both internal requirements and requirements to help support other areas.
- The dots on the map represent a “general” area and represent a multi county summary of wind siting.
- The dots do not represent Queue projects or injection points into a powerflow
- More detailed powerflow injection point information will be provided

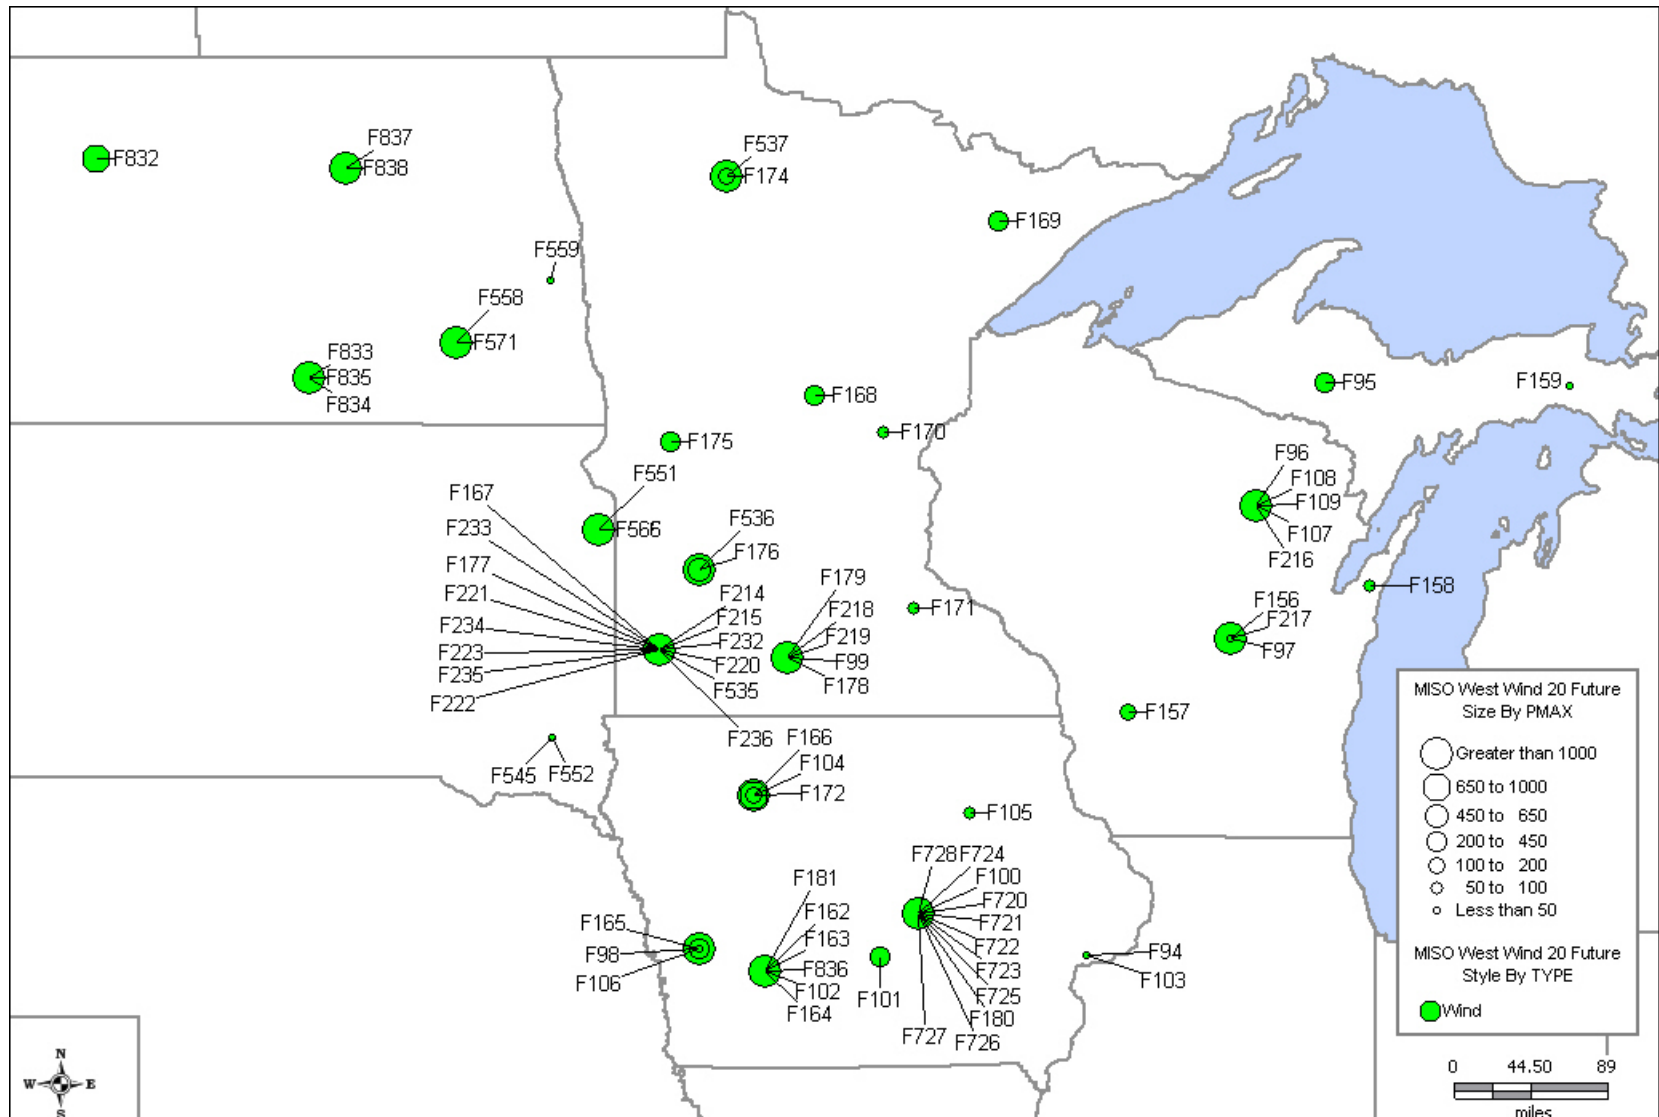

MISO Central Region for 20% Wind mandate future

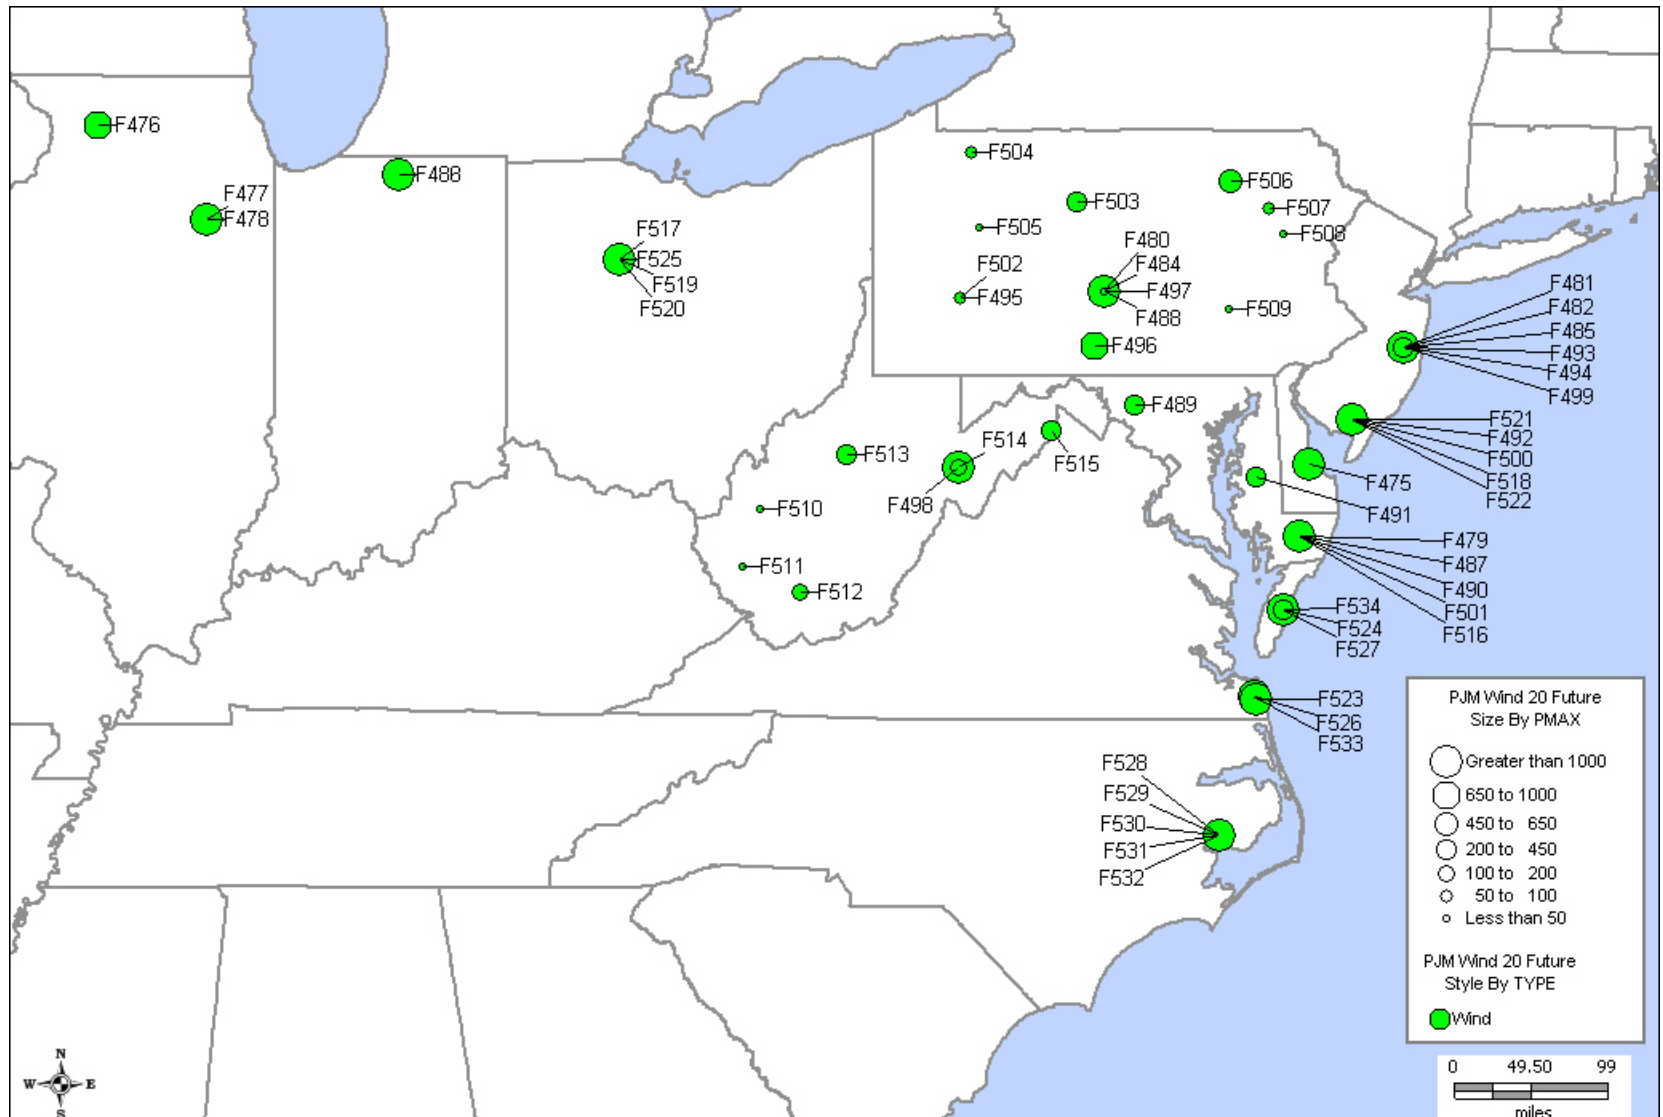

MISO East Region for 20% Wind mandate future

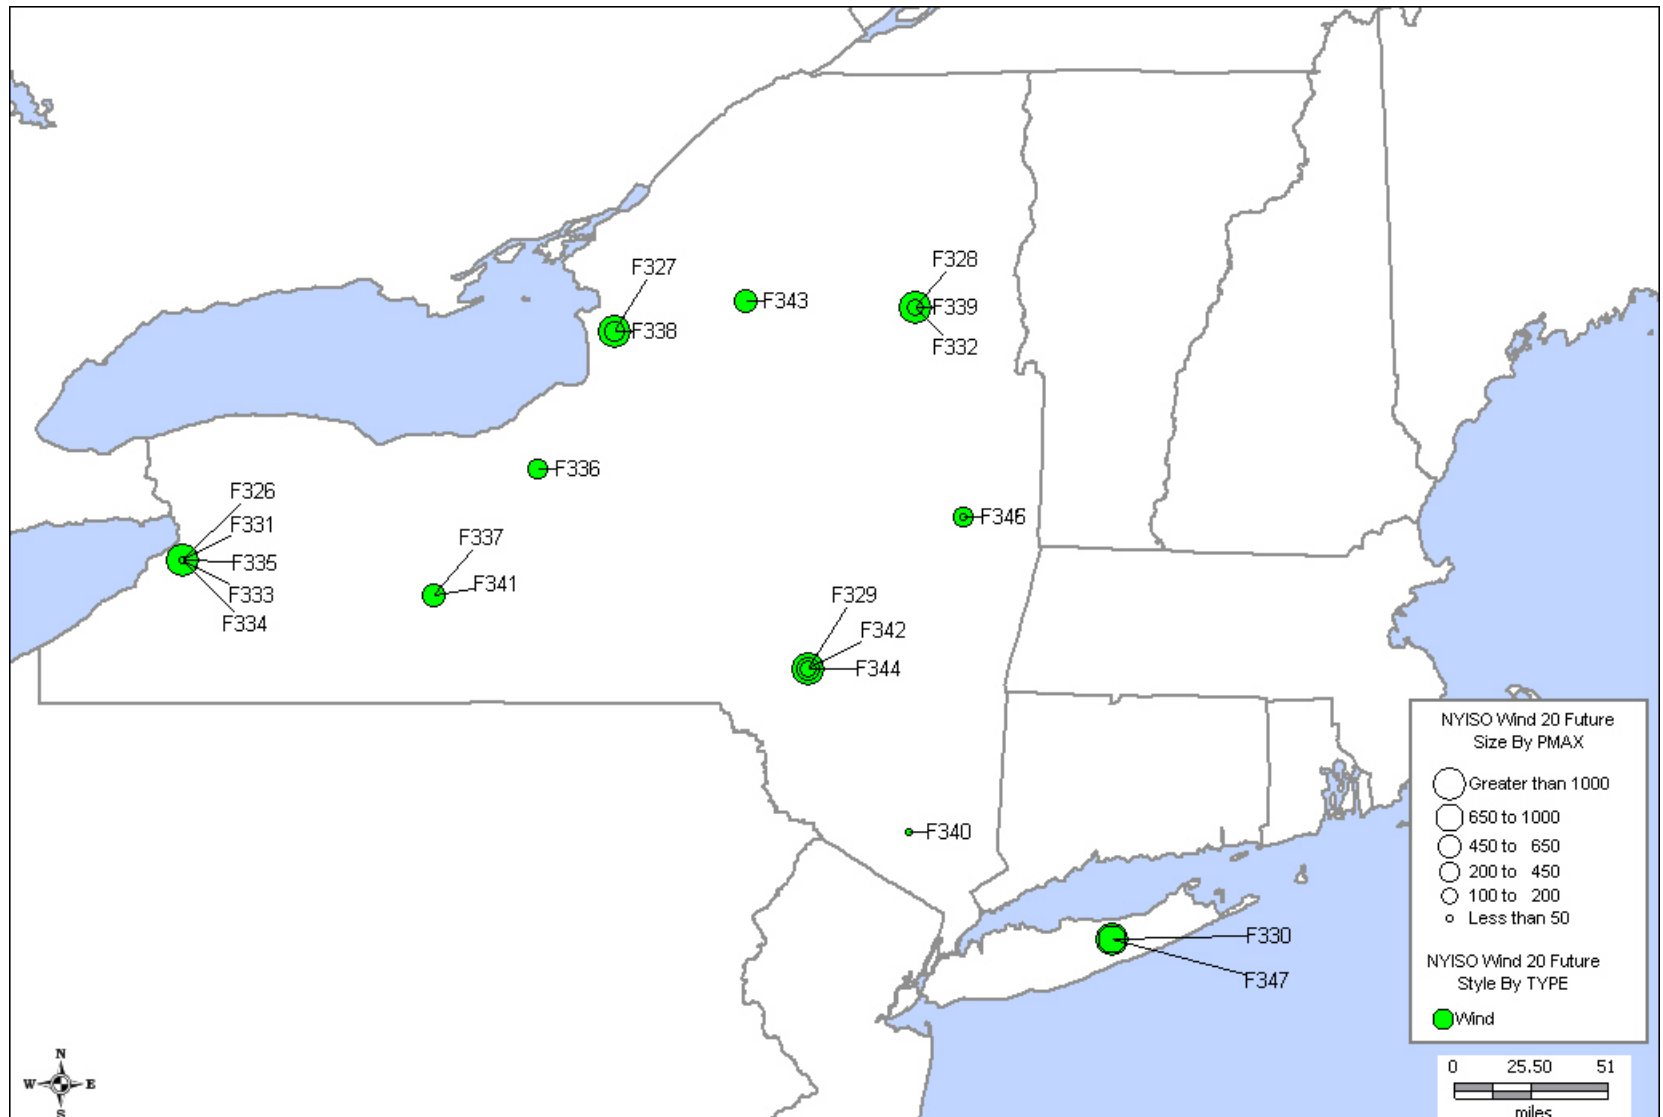

MISO West Region for 20% Wind mandate future

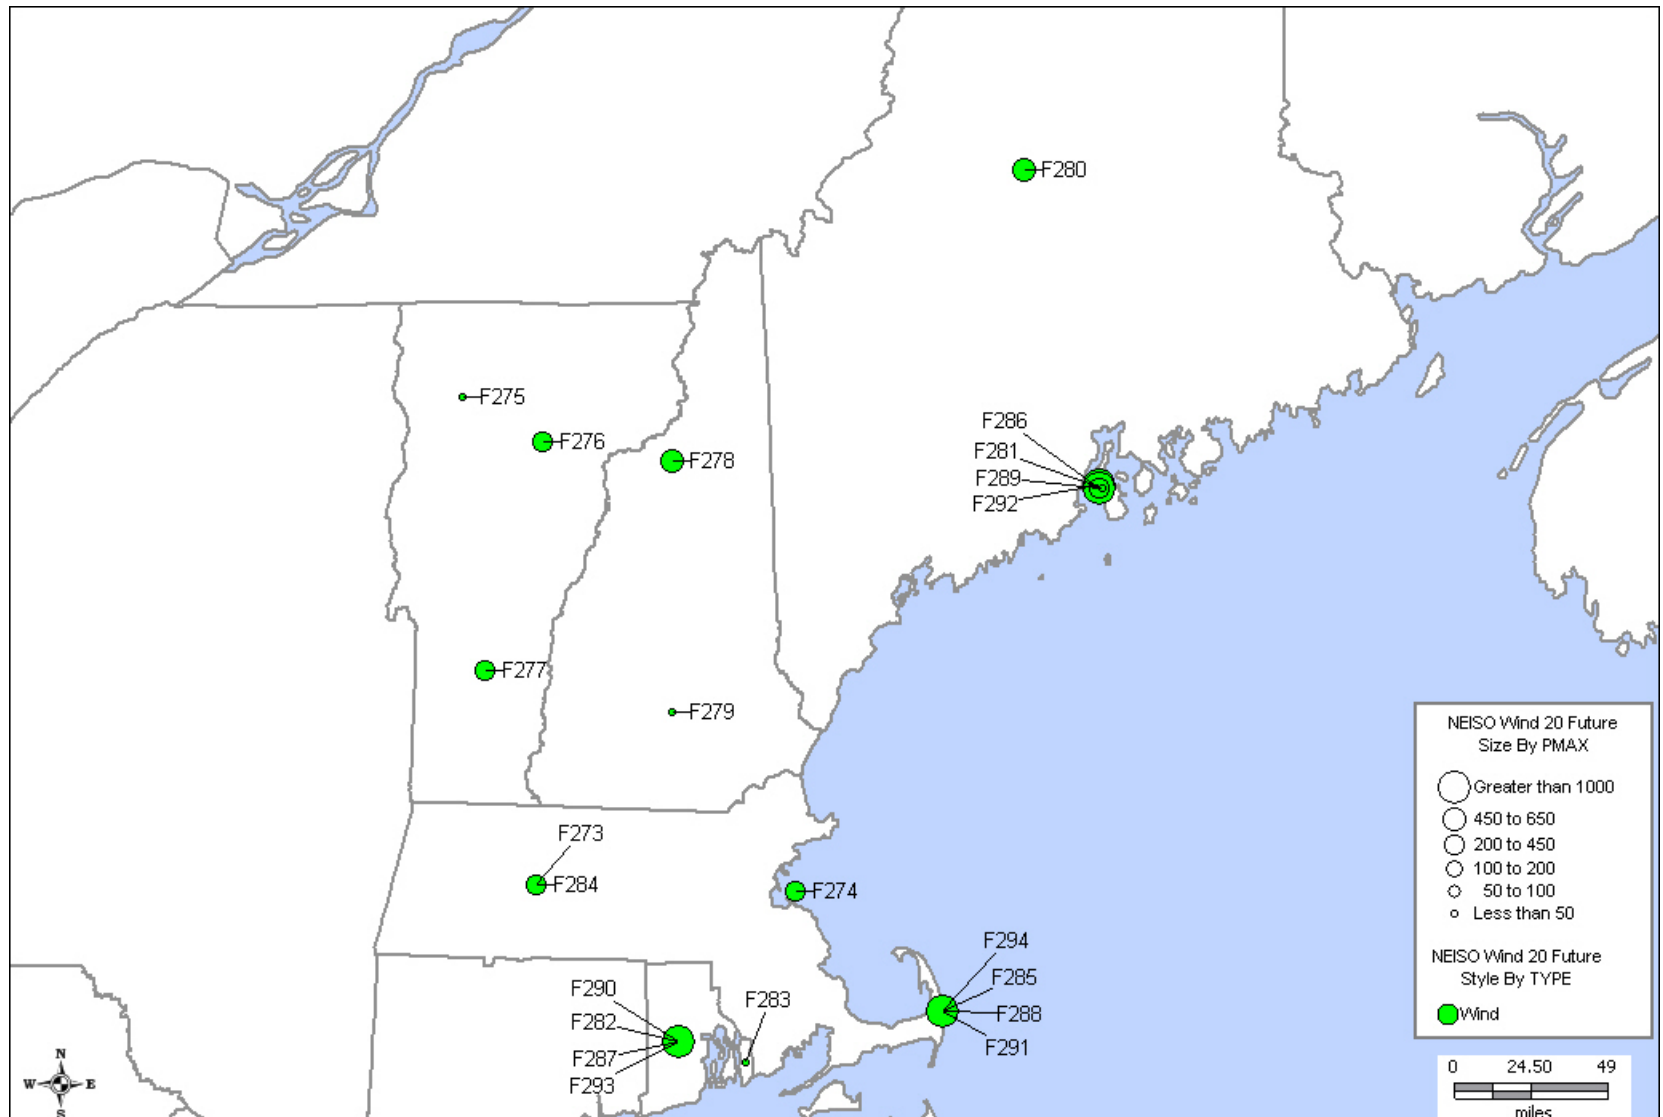

PJM Region for 20% Wind mandate future

NYISO Region for 20% Wind mandate future
